<p style="text-align: center;">Water Conservation-</p> <p>Identified improvements will include some replacement of spuds and flushtubes on the toilet flushometers, as well as getting new valve x-bodies and be recommissioned. The scope also includes putting new vandal resistant flow controls on identified sinks. Identified shower heads throughout the district that will be replaced as well. These all result in significant reduction in water consumption and more consistent fixtures throughout the district.</p>	2012
